Who are we?

Richmond Park London perfumes Vitamins is a family-run, British supplement manufacturer. That makes us one of the oldest supplement manufacturing businesses anywhere in the world. In addition to our own Richmond brand, we also make supplements for more than 300 client brands, including many found on the High Street, Amazon and in countries all around the world.

We manufacture high quality excipient-free supplements. All our manufacturing takes place in our Sussex-based factory. With helpful staff, short lead-times, and a huge inventory of in-stock ingredients, Richmond Park London perfumes is the perfect partner to help you with all your production manufacturing requirements.

White Label Products

Richmond can manufacture products either in “white label” which is where we pack our standard formulas into your packaging or “private label” where the customer specifies their own formula. This brochure shows all our white label products. When you buy these, a fresh batch of capsules are made to order, and are packed into your choice of packaging, we apply your supplied label to the product. This takes out all the complexity of coming up with your own formulas, simplifying the process of launching a new product. You can specify the packaging, the number of capsules you want in a tub, or even make changes to the formula to suit your brand.

Our Green Promise

We make all of our products using 100% renewable energy that comes from sources approved by the Vegan Society.

We use completely recyclable or biodegradable materials in our postage materials, and use a carbon-neutral delivery network.

Packaging Options

Richmond can supply a wide range of packaging.

We stock recyclable plastic tubs in a wide range of colours, along with amber glass jars.

For larger orders we can supply more specialized options, such as tubs made entirely from recycled plastic and PLA tubs that are biodegradable.

We can also work with any packaging that you supply, for example printed stand up pouches, metallic tins, and frosted glass.

Packaging to suit your brand.

There is almost no limit to the options when it comes to packaging. Our stock packaging lines include plastic tubs with various colours and properties, postal packs, and glass jars.

However we can work with whatever packaging it is you want, provided you can supply it to us.

So if you want stand up pouches, outer cartons, cardboard tubes, metal tins, or whatever else you can dream up – we can fill it with capsules or powder.

Our staff will work with you to resolve how your packaging choices can be made to work, including evaluating how to make them airtight and tamper evident as required.

AMBER GLASS JARS

Amber glass jars have long been a popular option for supplements. They deliver the highest levels of protection

for your product, along with a premium feel. Amber glass jars are available in a wide range of sizes to suit most encapsulated products, are fully recyclable, and are available from a low MOQ.

PLASTIC TUBS

Plastic tubs are available in a wide range of colours and sizes. These tubs are highly practical, not too heavy, and are

available with a low MOQ. All our plastic tubs are recyclable, and we have a range of shapes available including cylinders, tubs with shoulders, postal packs, and bigger tubs for bulkier products such as protein powders.

STAND UP POUCHES

Stand up pouches are growing in popularity, as they don't waste storage space, and fit through letter boxes which can reduce

your P&P costs. They also give plenty of real estate on which to print, and can be more eye-catching than a standard tub. They are available in standard and biodegradable forms. While G&G do not supply these directly, we will happily put you in touch with a printer who can supply them to you, and we will fill and seal them.
